EuroStoxx	-6.51%	+0.88%
MSCI World	+5.62%	+2.29%

WHAT IS APHILION Q² - EQUITIES ?

- An all equity investment fund (SICAV, registered in Belgium), investing globally.
- Aphilion's investment universe consists of more than 4000 stocks worldwide; these more or less constitute the largest stocks in each market.
- The actual portfolio is very focused and consists of ± 80 stocks, a geographically and sectorally well balanced selection from the investment universe. This is more than adequate for risk-control purposes yet still allows each position to be monitored closely (news-flow, trading opportunities, ...)
- The stock selection process is based on a set of in-house financial-econometric models and tools which use fundamental data (earnings, interest rates, etc) to evaluate the return-potential of our investment universe on a daily, real-time basis.
- The base model has a (partially in-sample) track record going back to 1990, with an average annual outperformance of 9,8%; Aphilion Q²'s impressive performance since its launch on December 5th, 2001 is a logical extension of this.
